

Surface Cleaning Vehicles

Since 2001 Triverus llc has been developing a vehicle platform to effectively clean the flight deck surfaces on aircraft carriers. Triverus uses Patent Pending technology to address this cleaning problem. The technology addresses unique needs from the shipboard perspective as well as other markets:

The technology performance has excellent cleaning capabilities combined with waste management. The solution for complete surface cleaning is environmentally relavant in that undesirable material can be removed from flat surfaces with excellent recovery efficiency.

- Low-Disposal Footprint
- Water-Only Cleaning
- A fit-for-purpose cleaning vehicle platform
